

Four-Head Video Cassette Recorder with 7-Event/1-Year Timer

- *4-head, double azimuth design*
- *LED clock display*
- *7-event/1-year timer*
- *Infrared remote control*

Full Auto-Feature Package

- *Power on*
- *Digital auto tracking*
- *Auto play*
- *Auto repeat*
- *Auto rewind*
- *Auto eject*
- *Auto power off*

Programming & Record/Playback Features

Auto Satellite Link™

If you own a satellite dish, this is the feature you've been waiting for. Set your DBS receiver to turn on and tune in to a specific program and it will automatically turn on the VCR in the record mode and then turn off when the DBS receiver turns off. The secret is in the A/V input jack panel. It senses the presence of a video signal...and the rest is history.

One-Touch Record

Record up to 8 hours or to the end of the tape with the touch of a single button. Each touch of the OTR button adds 30 minutes of additional recording time.

7-Event/1-Year Smart Programming

Program your VCR for unattended recording of up to 7 separate programs over a full 365-day period. No manual setting, adjusting, or programming of the calendar function is required.

Remote Control Onscreen Menu Programming

Program by remote control for unattended recording, with programming instructions onscreen for visual verification. Onscreen menus lead you through normal, daily, or weekly programming by program number, channel to be recorded, start and stop times, speed, and date of recording by day, month, and year. Pressing the clear button lets you go back and reprogram over mistakes, and pressing the menu button at the end of programming verifies that instructions are locked into memory.

Picture

4-Head, Double Azimuth Design

Combines direct drive cylinder and capstan motors with precision digital servo control to produce excellent special effects reproduction—Still, Slow, and with the appropriate remote control, Frame Advance and Variable Slow Motion—at both SP and SLP speeds.

Digital Auto Tracking System

When tape playback begins, this feature automatically seeks the optimum tracking position in the tracking range, and the optimum audio signal tracking position for clearest picture and sound. Buttons on the remote transmitter give you manual control should tracking adjustments be necessary.

Rental Play

Get your money's worth from "well-used" rental tapes by improving the picture quality. Activate Rental Play, relax, and enjoy your favorite video with exceptional clarity and smooth, even detail.

Convenience

Automatic Channel Setup

The VCR tuner scans through television frequencies, automatically storing active broadcast channel into memory. Then, only active channels programmed into memory are tuned using the channel up/down buttons on either the remote or front panel of the VCR. Automatic channel preset can be repeated whenever desired, should new channels become available. Channels can be manually added or deleted.

181-Channel FS Tuning

The digital quartz tuner can receive up to 181 channels, including UHF, VHF, and 113 cable channels, without the inconvenience and expense of a cable company decoder/converter (on non-scrambled cable systems). Channel tuning is by random access with the remote control transmitter or scan tuning up and down by remote or at the set.

LED Function Indicators

Alerts you to the status of all important recording and playback features with simple, easily recognized, international symbols.

Bilingual (English/French) Onscreen Function Display

Indicates record/playback functions, channel number, clock setting, date, counter, programming, one-touch record and record standby, keeping you alert to the status of all features in a heads-up onscreen display.

Onscreen Real-Time Counter with Time Search

Unlike the 0000 to 9999 tape counters found in standard VCRs, this unit incorporates a linear, real-time counter which shows elapse time in hours, minutes, and seconds. Now you can advance or return to selected tape segments in any time increment you desire.

Timer/Programmer Back-up System

Retains timer programming information for up to 1 full minute in the event of momentary power interruptions.

Auto Return

Quick Find

Repeat Play

Quick Start Mechanism

Audio/Video Input/Output Jacks

Special Effects

Variable Slow Motion

View SP or SLP video recordings in slow motion in both forward and reverse modes. Slow motion speed can be adjusted from 1/5th to 1/60th normal speed in either direction.

15x Forward/Reverse Latching Search

Search in forward or reverse mode at 15 times normal playing speed in SLP. The Latching Search feature provides continuous forward or reverse search with a single touch of the control. A second touch stops the search operation and returns the unit to the Play mode.

Index Search

Remote Control

Multifunction Infrared Remote

Controls all operating features and functions of this VCR with armchair convenience—including all special features, random channel access, and channel scan up/down providing an LED virtual "handshake" for confirmation.

Full Auto-Feature Package

- Power On
- Digital Auto Tracking
- Auto Play
- Auto Repeat
- Auto Rewind
- Auto Eject
- Auto Power Off
